

OUR EQUIPMENT REDUCING YOUR COSTS

WASTE HANDLING EQUIPMENT INDIVIDUALLY DESIGNED
ALLOWING US TO LOOK AFTER YOUR WASTE WHILE YOU
LOOK AFTER YOUR BUSINESS.

AS PART OF OUR BESPOKE RECYCLING SOLUTIONS, RECONOMY OFFERS A WIDE RANGE OF WASTE HANDLING EQUIPMENT – FROM COMPACTORS TO AIR SYSTEMS – PROVIDING AN EFFICIENT WAY OF REDUCING YOUR WASTE VOLUME QUICKLY AND CONVENIENTLY.

Reconomy has a wealth of experience in providing waste handling equipment for many different waste types.

Reconomy can provide the following equipment:

COMPACTORS

Compacting waste provides a much cleaner alternative to open bins and also increases the amount of waste volume each bin can hold. This reduces transport costs to you as well as reducing your company's carbon footprint.

VERTICAL/HORIZONTAL BALERS

Balers offer another method of compacting your waste – primarily for cardboard and plastics. Horizontal balers are generally advised for users producing larger amounts of waste.

AIR SYSTEMS

Full air systems are used to vacuum waste away at source, transporting it to a dedicated point for compacting into a collection bin. This system is flexible and can incorporate more than one compactor depending on need. Air recirculation can also be included, which is pumped through a filter and back into your building, helping to reduce energy costs.

R-POD

Exclusive to Reconomy, R-Pod is designed to provide a dedicated recycling area for your waste handling needs. R-Pod can incorporate all necessary equipment to handle your site's waste in an enclosed, controlled – and clean – environment.

Reconomy is committed to reducing CO₂ emissions where reasonably possible. In 2009, Reconomy opened the UK's largest 'Green Roof' recycling facility and has an on-going desire to recycle sustainably in an environmentally sensitive manner.
