

# RESPONSIBLY TREATED HAZARDOUS WASTE

RECONOMY PROVIDES A TAILOR MADE HAZARDOUS WASTE  
COLLECTION SERVICE DESIGNED TO SUIT YOUR BUSINESS,  
OFFERING RECYCLING AND GUARANTEEING FULL  
COMPLIANCE.

RECONOMY'S SOLUTIONS ENSURE FULL COMPLIANCE WITH CURRENT LEGISLATION BY FACILITATING SEGREGATION, STORAGE AND RECYCLING WHERE REASONABLY POSSIBLE OF YOUR HAZARDOUS WASTE.

Over the years, hazardous waste disposal has seen the introduction of increased legislative restrictions being placed upon it. You can be sure that this trend is set to continue, but you can also be sure that Reconomy offers hazardous waste collections and disposal which guarantees your compliance.

Hazardous Waste Regulations (England & Wales) which was introduced in 2005, brought about a ban on certain wastes which could previously have been disposed of as 'general waste'. Such waste (including paints, adhesives, inks, solvents, fluorescent tubes, oily rags and filters) now requires specialist disposal in separate UN approved containers.

Reconomy's solutions ensure full compliance with current legislation by facilitating segregation, storage and disposal of all hazardous waste. Reconomy offers a range of containers suitable for your needs, enabling you to separate hazardous waste as required by legislation, from small hazardous waste containers to drums and wheelie bins. In addition, by developing enhanced recycling routes for hazardous waste streams, Reconomy ensures that your waste is processed and recycled where the technology to do this is available.

For each movement of hazardous waste a fully completed consignment note will be provided to ensure that your duty of care is complied with. Also, Reconomy's container options are all UN approved and suitable for safe storage and transportation of hazardous waste. It couldn't be simpler.

Reconomy is committed to reducing CO<sub>2</sub> emissions where reasonably possible. In 2009, Reconomy opened the UK's largest 'Green Roof' recycling facility and has an on-going desire to recycle sustainably in an environmentally sensitive manner.
