

Land Remediation

Reconomy – leading the waste management sector

A **unique** turnkey **solution** for **contaminated** land from **Reconomy** – your **one-stop-shop** from start to finish.

From initial investigation to final completion and site validation – both onsite and ex-situ – Reconomy offers a streamlined service with just one point of contact over the life of the project. We proactively manage every aspect of land remediation to meet strict government targets for the development of brownfield sites.

We deal with technical queries and offer expert analysis for correct categorisation and recommendations for treatment and disposal.

Call us on today for the following services:

- 24-hour response and rapid sampling
- Bio-remediation, both onsite and ex-situ
- Chemical oxidation
- Demolition and clearance/treatment of hazardous material prior to demolition
- Environmental advice incorporating site investigation and recommendations for remediation
- Ground engineering, including management and operation of specialist excavation, transport and disposal
- Ground water treatment barriers
- Site clearance
- Soil segregation and screening techniques to minimise treatment costs
- Soil washing
- Stabilisation and solidification for inorganic and organic contamination
