

SUSTAINABLE PLASTERBOARD RECYCLING

RECONOMY OFFERS A RANGE OF NATIONWIDE
PLASTERBOARD COLLECTION AND RECYCLING OPTIONS,
PROVIDING A SUSTAINABLE AND COST EFFECTIVE
SOLUTION FOR GYPSUM WASTE.

THE ENVIRONMENTAL IMPLICATIONS AND LEGISLATION ASSOCIATED WITH PLASTERBOARD MAKE ITS DISPOSAL VERY EXPENSIVE AND ENVIRONMENTALLY DANGEROUS. RECYCLING IS NOW A VIABLE ALTERNATIVE OFFERING CONSIDERABLE COST AND ENVIRONMENTAL BENEFITS.

Reconomy has formed close partnerships with reprocessors and recyclers to offer a nationwide collection service, ensuring all waste plasterboard removed is processed and returned to various end uses, thereby achieving zero to landfill and assisting towards sustainability targets.

Using flexible methods of removal and an established vehicle fleet, Reconomy is able to collect using either the current accepted bag system, or utilising skips for larger volumes of gypsum waste.

Our experts are ideally positioned to advise and deliver a tailor made solution for your project, offering a flexible management service by supplying a variety of collection methods, including:

- A range of skips/ROROs
- Wheelie bins
- Bags
- Wait & load services

The collection and recycling of plasterboard is linked to Reconomy's unique waste reporting facility – providing actual data on waste tonnages, volumes and cost – for use in monitoring project performance and environmental management assessment.

Reconomy is committed to reducing CO₂ emissions where reasonably possible. In 2009, Reconomy opened the UK's largest 'Green Roof' recycling facility and has an on-going desire to recycle sustainably in an environmentally sensitive manner.
