

## Plasterboard Recycling Services

**Reconomy – leading the recycling and waste management sectors**

## Flexible nationwide plasterboard collection and recycling.

**Millions** of tonnes of **waste plasterboard** are generated every single year. But did you know that **most** of it can be **recycled** and **reused**?

All waste plasterboard removed by Reconomy is processed and returned to a variety of end uses, including the manufacture of new plasterboard, for cement, and even for use in soil conditioners.

What's more, Reconomy can help you with segregation onsite as well as nationwide collection.

Whether you're using:

- Skips
- ROROs
- Wheelie bins
- Bags
- Wait and load services

Reconomy should always be your plasterboard removal first point of call.

### The information you need

In addition, Reconomy's collection and recycling service is linked to a unique waste reporting facility. This can provide you with the information you need for monitoring project performance and environmental assessment, such as actual waste tonnages, volumes and cost.

“ We **proactively** work with our **clients** to **drive down** the **cost of waste**. ”
