

COVID-19 decontamination services

For
a **safe**
working
environment

Are you ready for safe working?

COVID-19: enhanced protection for your workforce, contractors and other visitors.

- Innovative electrostatic disinfection system effective against COVID-19
- Fight the fear of infection: protect wellbeing as well as physical safety

Reconomy offer a tailored regime for regular and effective COVID-19 protection, perfect for all working environments from offices, schools, care homes, retail and hospitality through to construction and housebuilding sites. Our decontamination services provide your workers safety and peace of mind.

Regular on-site enhanced infection control procedures ensure sanitising and disinfection of:

Site access points

Entrances and exits

Changing facilities

Showers and drying rooms

Toilet facilities

Including portaloos

Plant and equipment

Including hand tools

Canteens and eating areas

All high touch point areas and communal areas

Vehicles

Cars, Lorry Cabs and buses.

Bins and bin stores

Gunning for COVID-19:

more effective, sustainable, dependable and persistent than conventional disinfection methodologies.

In formal testing at accredited laboratories our control spray is **proven to kill >99.99% of enveloped viruses** (such as COVID-19) and non-enveloped viruses within minutes of contact.

Electrostatic disinfection

What is it? The system electrostatically charges a powerful anti-COVID-19 chemical, making it coat surfaces more effectively and remain active for longer.

The technology is a new protocol in disinfection that is revolutionary, persistent and effective. It is also safer and more sustainable than conventional cleaning methodologies when disinfecting all environments.

All sprays are designed to create a hostile environment for all pathogens, greatly reducing recontamination. All spray products are natural and biodegradable so are safe for use in all environments.

Flexibility to meet your needs

Reconomy offer two disinfection options:

1

Option 1: **'Control' product**,
delivered by electrostatic sprayer
Effective on surfaces for up to 48 hours*

2

Option 2: **'Zoona' product**,
delivered by electrostatic sprayer
Effective on surfaces for up to 30 days*

Both options are available on **same day, next day and out of hours services**

*High use or high traffic areas may have shorter duration of latent protection after treatment.

Conventional cleaning and decontamination

Hazardous chemicals

In many cases, these chemicals are not effective because they are immediately wiped off surfaces as part of the application process.

Multiple products and methodologies

All dependent on the knowhow, skill and diligence of the operative.

Time consuming

1 litre covers 36m² in 11 mins 41 seconds.

Ineffective

So may allow bio-burden to increase over time.

Electrostatic cleaning and decontamination

65% LESS CHEMICAL PRODUCT.

No chlorine, bleach, alcohol, solvents, flammable or corrosive liquids, or odours.

Instead hydroxyl free radicals attack viruses, bacteria and fungi by:

- Attacking membrane lipids
- Breaking apart nucleic acids
- Denaturing proteins
- Disrupting cell walls
- Oxidation of cell bonds.

1

One delivery system

Easier to apply, delivering an ionised 40 micron layer of disinfectant that fully and evenly coats all surfaces.

Fast

1 litre covers 150m² in 10 mins 20 seconds.

Persistent and eco-friendly

The electrostatic spray repels pathogens, providing longer lasting protection, and is naturally non-toxic.

COVID-19 protection.
